NORMA Group receives major order from German car manufacturer

Maintal, Germany, 2 October 2015 – NORMA Group, a global market leader in engineered joining technology, has received a major order from a German car manufacturer. Beginning in 2017, NORMA Group will annually manufacture in Europe up to 28 million joining products and thus equip several million vehicles worldwide by the year 2027. The contract includes NORMAQUICK PS3 quick connectors and NORMAPLAST SV hose and pipe connectors in the nominal sizes 6 to 32 millimeters which are used in the vehicle cooling systems.

"We look forward to working with our customer on this large-scale global project," says Werner Deggim, CEO of NORMA Group. "For us, this is also about our responsibility for a cleaner environment. After all, our weight-reduced products help lower emissions by reducing the total weight of vehicles and, in turn, reducing fuel consumption."

NORMAQUICK PS3 quick connectors made of recyclable materials connect heating and cooling lines and charge-air systems. The compact design of the connector allows for it to be used even where mounting conditions are tight and enable quick installation. Thanks to the integrated mounting bracket, PS3 quick connectors can be installed and removed without the use of tools. Assembly also can take place during fully automated processes. An integrated gasket ensures the proper tightness.

NORMAPLAST SV hose and pipe connectors connect plastic pipes such as PA6 and PA12 pipes. They are made of black polyamide 6 or polyamide 12 with 30 percent glass fibers and can be supplied with O-rings.

Additional information on the company is available on www.normagroup.com. Please visit our platform www.normagroup.com/images for press photos.
